

Omar Siddiqui

Rutherford, NJ | omar.s.siddiqui54@gmail.com | www.osid.dev | github.com/osid54

SUMMARY

Aspiring Software Engineer with strong experience building full-stack, cloud-based applications for web and mobile using React, FastAPI, Flask, PostgreSQL, and AWS serverless technologies. Skilled in developing scalable backend systems, deploying production-grade web and mobile applications, and working across the entire development lifecycle. Actively seeking roles in software engineering, full-stack development, backend systems, or cloud engineering.

EDUCATION

New Jersey Institute of Technology – Ying Wu College of Computing

B.S. in Computer Science

B.S. in Mathematical Sciences, Applied Mathematics

May 2026

GPA: 3.665

Relevant Coursework: Guided Design in Software Engineering, Advanced Data Structures and Algorithm Design, Database Systems

PROJECTS

Stardewdle – Wordle-like Game | www.stardewdle.com | Vite.js, Node.js, AWS, Cloudflare R2

A daily guessing game based on the game Stardew Valley with a serverless architecture and thousands of recurring players.

- Engineered a high-availability serverless platform powering 3,000+ daily users and 400,000+ total plays.
- Automated daily puzzle generation with EventBridge and Lambda using scraped wiki data stored in DynamoDB and Cloudflare R2, with global CDN caching and custom CORS policies, reducing edge load by 95% for a global user base.
- Built a React and Vite.js frontend with Tailwind and social-sharing features, deployed via AWS Amplify utilizing HSTS security headers and immutable local caching to improve Core Web Vitals and load performance.
- Maintained and iterated on the platform for 12+ months, shipping feature updates and bug fixes for active users, while maintaining near-zero operational costs.

Teacher's Pet – Worksheet Generator | www.teachers-pet.site | Next.js, FastAPI, PostgreSQL, Railway, Vercel, ReportLab

A full-stack platform for generating customizable, reproducible math worksheets and answer keys.

- Developed a worksheet generator with seed-based randomization producing consistent, reproducible PDFs.
- Built FastAPI services for dynamic generation, PDF assembly, and template management with search, tags, and sharing.
- Deployed frontend and backend through independent CI/CD pipelines across Vercel and Railway.

ChefAsap – Mobile Chef Booking Platform | React Native, Expo Router, Flask, PostgreSQL, Stripe, EAS, Render

A mobile application for discovering chefs, ordering menu items, and scheduling bookings with real-time communication.

- Built a dual-role mobile platform where customers discover chefs by location, cuisine, and dish, schedule in-person cooking sessions, and pay for meals with integrated Stripe payments.
- Implemented chef tools for menu and meal creation, scheduling, and booking management with real-time updates.
- Added bi-directional chat and notification-driven booking flows, with backend models for users, menus, and reviews.

Mediline – Healthcare Portal | www.mediline-njit.com | Vite.js, Flask, MySQL, WebSockets, Axios, React Query

A role-based healthcare platform supporting patient, doctor, and pharmacist workflows.

- Built modular dashboard components for managing appointments, billing, prescriptions, and profiles across user roles.
- Integrated Axios + React Query for optimized data fetching and added real-time chat/alerting via WebSockets.
- Delivered a polished MVP deployed with a distributed architecture across Azure for frontend and GCP for backend.

EXPERIENCE

International Game Developers Association, NJIT

Member, Game Jam Participant

Newark, NJ

September 2022 – present

- Build rapid prototypes during 48-hour game jams, working with cross-disciplinary teams of developers and artists.
- Practice iterative design, time-constrained problem-solving, and collaborative development.

MenteeGo Education

Tutor for Math and CS

Rutherford, NJ

February 2022 – present

- Tutor students in mathematics and CS, developing personalized learning plans tailored to individual needs.
- Manage scheduling and prioritize tasks for multiple students to ensure consistent academic progress.

SKILLS & CERTIFICATIONS

Programming Languages: Java, Python, JavaScript, C#, Bash, C, C++

Cloud & DevOps: AWS (Lambda, S3, API Gateway), Cloudflare (DNS, WAF, R2), Vercel, Railway, CI/CD, Git (GitHub)

Backend & APIs: Node.js, FastAPI, Flask, REST APIs, JWT, BeautifulSoup, SQLAlchemy, Pydantic, Axios

Frontend & UI: React, Next.js, React Native, Vite.js, Expo Router, Tailwind CSS, SASS, Figma

Databases & Tools: SQL (PostgreSQL, MySQL), NoSQL (DynamoDB), WebSockets, Alembic, Postman, Jira, Trello

Certifications: AWS Certified Cloud Practitioner (May 2025), Foundational C# with Microsoft (May 2026)
